

PRECISION MACHINED SOLUTIONS FOR COMPLEX, HARD METAL REQUIREMENTS

GroupAero Seattle is your complete source for the manufacturing of larger, sophisticated machined components for the commercial aerospace and defense markets.

We offer a unique perspective that blends our performance-driven defense experience with the cost-conscious needs of commercial aerospace. The results are optimized solutions with the sense of urgency today's marketplace demands.

Engine Ring Segment in process for an SNK RB200F 5-Axis Bridge Mill

Services:

A full-service manufacturing facility with a team of dedicated, pioneering employees:

- Machining: 3, 4 and 5 axis
- Engineering and Program Verification
- CNC Mill/Turn and turning
- First part inspection for work orders, tool changes and shift start
- CMM programming and inspection

Programs Supported

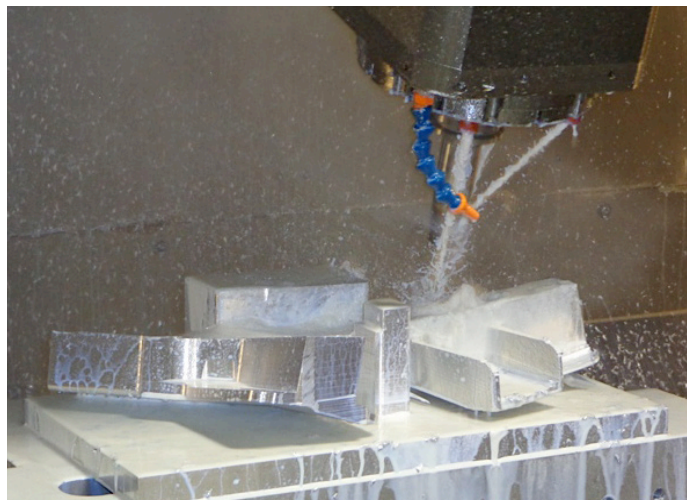

We work with and are approved by major aerospace companies:

COMMERCIAL

- B737
- B787
- B717 Upgrades
- Next Gen Business Jets

DEFENSE

- F-35
- F-18
- C-5A/B Upgrades

5-Axis Machined Aircraft Structural Bracket

INNOVATIVE AND ROBUST PROCESS. DEPENDABLE SOLUTIONS.

An eye toward innovation throughout the manufacturing engineering process maximizes your value and results in a cost-competitive, reliable and value added solution. We can also support projects with existing design and file formats using software that includes Mastercam, Catia V5 and Vericut.
